

WATERHILL CAVOODLES | THEODORES

Healthy Happy Huggable

Stud Dog Terms of Service

Waterhill Robert Redford's Details:

- ◆ Size: 35cm at shoulder
- ◆ Weight: 7 - 7.5kg
- ◆ DOB: 2/02/2020
- ◆ DNA : Orivet full breed profile—CLEAR
- ◆ DNA Features: e/e, I/I, FF (IC/IC)
- ◆ Health: excellent
- ◆ Temperament: Fun loving friendly and affectionate. Intelligent happy disposition.
- ◆ Master Dog Breeders Association (MDBA) Theodore Infusion Number: 77173

STUD FEE & INCLUSIONS

- ◆ Stud Fee: \$1200 with \$200* payable at the time of booking and the balance payable at the first successful mating (payments to be made by cash or immediate (Osco) bank transfer.
- ◆ Includes two visits for a natural tie or sperm collection for AI (Travel fees may also apply)

* The booking fee is paid to secure your mating window for the first 10 – 14 days of your girls' season and is non-refundable should you not turn up.

TERMS for Natural Mating

- ◆ Available to breeding girls between 28cm and 36cm only.
- ◆ Please indicate if this is a maiden/first mating.
- ◆ Please indicate if your breeding girl is dog aggressive or nervous
- ◆ Your breeding girl must be
 - ◆ up to date with all vaccinations and parasite treatments
 - ◆ bathed and clipped for cleanliness and infection prevention
 - ◆ in good health
 - ◆ has had progesterone test results of between 20 and 40 at the first visit
- ◆ At the time of mating please bring your girl to Redford on your own (or ask your family to wait in the car) as too many people present can be distracting for both Redford and your girl and may prevent a successful mating from occurring.

TERMS for Sperm collection for AI

- ◆ To be completed at Queensland Veterinary Services (QVS) Stafford (unless agreed alternative)
- ◆ An additional travel fee of 0.78c per km will apply

BOOKING PROCESS AND MATING TIMING

- ◆ To book Redford, let us know on day 1 of your girl's season/bleeding. At this stage we will request a booking fee payment to schedule a mating time for approx. 10 – 14 days.
- ◆ Book your progesterone tests and/or schedule your visits to QVS (they will guide you on the timing)
- ◆ Keep us informed of the progesterone test results (you may do several tests) and inform us when the result is at 20 or more – this is the time for the first mating.
- ◆ Mating will occur at Waterhill (Kenilworth)
- ◆ Allow 45 minutes for a natural mating, and for 2 visits to be 12 to 24 hours apart.

GENERAL TERMS and CONSIDERATIONS

- ◆ It is your responsibility to bring your girl to Redford at her optimum breeding time.
- ◆ Pregnancy and/or number of puppies is not guaranteed. The number of puppies in a litter is dependent on a number of factors including how many eggs your girl releases – not the viability of the stud. A singleton puppy is a pregnancy
- ◆ Should pregnancy not be successful we offer a free return service except where progesterone test results were not between 20 and 40 at the time of mating, and on vet report of barren ultrasound within 35 days of mating.
- ◆ Any return service must be used by the same girl within 12 months or 2 seasons. Additional travel expenses will be charged for the return mating if applicable.
- ◆ Breeding is not risk free, it is your responsibility to understand the risks to your girl of mating, pregnancy and whelping.
